

NOT-FOR-PROFIT SYMPOSIUM

January 11, 2024

CPE Information

Join colleagues for the 2024 Not-For-Profit Symposium to hear about key opportunities and strategies for the industry in the current environment. The keynote speaker will provide insight into leveraging AI for strategic growth and impactful processes to demystify AI, showcase its practical benefits, and provide a roadmap for integrating AI into nonprofit strategies for greater impact and efficiency. Also, hear presentations on green energy incentives available for tax-exempt entities, enterprise risk management best practices, and utilizing the most beneficial ratios to measure financial and organizational success.

Learning Objectives:

- Gain insights into the various applications of AI in the nonprofit sector, learn about tools that can enhance operational efficiency, and understand the importance of ethical considerations in AI implementation.
- Learn about key considerations for proper Enterprise Risk Management.
- Hear what green energy incentives are available for tax exempt entities and how to access those incentives.
- Recognize financial ratios that best measure progress and successes of a not-for-profit organization.

Prerequisites: Basic knowledge of not-for-profits

Advanced preparations: None

Program level: Update

Delivery method: Group Live and Group Internet Based
